

Your Gift. Even Greater Impact.

How a 10% Levy Helps Meet Greatest Need

When you choose to support a specific piece of equipment, program, or department, you're making an incredible difference for patients and care teams. To ensure your gift has the greatest possible impact—not just in one area, but across the hospital—a small portion is directed to what we call the Greatest Need Fund.

What Is the Levy?

A 10% levy is applied to all restricted donations—gifts directed to a specific purpose. This levy supports the essential systems, staff, and flexibility that bring your gift to life. It allows us to deliver what you've envisioned, and to do it with excellence, sustainability, and responsiveness.

Your generosity continues to make a difference far beyond the original designation.

How It Works

You Give...

\$100,000 toward NICU cardiac monitors

Your Impact...

\$90,000 directly supports the monitors you chose
\$10,000 strengthens hospital-wide capacity through Greatest Need

That 10% isn't overhead—it's over-and-above. It helps ensure that every dollar you give delivers lasting change.

What Your Levy Supports

Because of this flexible support, we're able to:

- Deliver Projects Successfully – from ordering to installation to follow-up
- Respond to Urgent Needs – like unexpected equipment failures or emergency upgrades
- Support Underfunded Priorities – ensuring all patients receive the same high level of care
- Keep Our Commitments to You – with transparent reporting and strong stewardship

Why It Matters

The needs of a hospital are always evolving. Sometimes, the most urgent priorities don't come with a donor. Sometimes, a life-saving project needs one more step to be fully implemented.

That's where your levy makes a difference. It gives us the ability to act when timing is critical—and to keep patients at the center of every decision we make.

You Make It Possible

By supporting a specific area and contributing to greatest need, you're:

- Empowering your gift to go further
- Strengthening care for every patient, not just in one department
- Helping us meet today's needs—and tomorrow's

We're deeply grateful for your trust. Every dollar is used with care, transparency, and purpose.

"You're not just funding equipment. You're helping build a healthier, more responsive hospital—for everyone."
